## EMPLOYEES' RETIREMENT SYSTEM OF THE STATE OF HAWAII

INTRODUCTORY SECTION

### STATE OF HAWAII EMPLOYEES' RETIREMENT SYSTEM

December 8, 2003

Honorable Linda Lingle Governor, State of Hawaii Honolulu, Hawaii 96813

Dear Governor Lingle:

It is my pleasure to submit the Employees' Retirement System's (ERS) Comprehensive Annual Financial Report for the fiscal year ended June 30, 2003. This report provides information on the financial status of the ERS and highlights significant changes that occurred during the past fiscal year.

After two long years of negative investment returns, the ERS' investment portfolio had a 2.97% gain for the fiscal year ended June 30, 2003. While we are encouraged by the positive results, we remain concerned about the unfunded accrued liability, which increased from \$1.8 billion in June 2002 to \$2.9 billion in June 2003 on an actuarial basis. The primary reason for the increase in the unfunded accrued liability was the negative investment returns over the prior two years.

During the past year, Board members and staff worked diligently with the actuary to complete a new hybrid contributory retirement plan study. The intent of the study is to design a new retirement plan that will improve retirement benefits for our members at no additional cost to the employers. The study was presented to the 2003 Legislature and received significant support. Enabling statutory language is now being developed for presentation to the 2004 Legislature.

As part of our on going efforts to provide quality service to our membership, the ERS released retirement benefits calculators on the ERS website so members can estimate their future benefits. In addition, the ERS launched the *Holumua* newsletter to members, retirees and beneficiaries of the ERS to provide them with retirement and retiree medical benefits information that may impact their future.

On behalf of the Board of Trustees, I would like to thank the dedicated staff, investment managers, consultants and the many others who have worked so diligently to assure the successful operation of the ERS.

Respectfully submitted,

Jackie Ferguson-Miyamoto, Chair

ackee terguson Muyamoto

Board of Trustees

LINDA LINGLE GOVERNOR

### STATE OF HAWAII EMPLOYEES' RETIREMENT SYSTEM

December 1, 2003

Board of Trustees Employees' Retirement System State of Hawaii Honolulu, Hawaii 96813

#### Dear Board Members:

It is our privilege to submit to you the Comprehensive Annual Financial Report (CAFR) of the Employees' Retirement System of the State of Hawaii (ERS) for the fiscal year ended June 30, 2003. Responsibility for both the accuracy of the data, as well as the completeness and fairness of the presentation, rests with the management of the ERS. To the best of our knowledge and belief, the enclosed data is accurate in all material respects and is reported in a manner that fairly presents the financial position and results of the ERS' operations.

The ERS was established by the Legislature in 1925 to provide retirement, disability and survivor benefits for State and county employees including teachers, professors, police officers, firefighters, judiciary employees, judges, and elected officials.

On March 31, 2003, the ERS' total membership of 97,831 was comprised of 62,292 active members, 4,150 inactive vested members, and 31,389 retirees and beneficiaries. This represents a 1.5% growth in the total membership over the past year. The number of retirees and beneficiaries had the largest net increase while the number of active members remained fairly constant. Participating employers include the State of Hawaii, City and County of Honolulu and the Counties of Hawaii, Maui and Kauai.

This report is divided into five sections:

- (1) <u>Introductory</u> includes transmittal letters, ERS' organizational structure, and a summary of benefit provisions and retirement options;
- (2) <u>Financial</u> contains a report of the Independent Certified Public Accountants, management discussion and analysis regarding the operations, the financial statements of the ERS and supplementary information;
- (3) <u>Investment</u> includes reports of investment activity, investment policies, investment results, and various investment schedules;
- (4) <u>Actuarial</u> contains the Actuary's Letter of Certification and results of the annual actuarial valuation; and
- (5) Statistical reporting significant data pertaining to the ERS.

City Financial Tower • 201 Merchant Street, Suite 1400 • Honolulu, Hawaii 96813-2980 Telephone (808) 586-1660 • Fax (808) 586-1677 • <a href="http://www2.state.hi.us/ers">http://www2.state.hi.us/ers</a>

#### INTERNAL CONTROLS

The management of ERS is responsible for and has implemented systems of internal accounting controls designed to provide reasonable assurances for the safeguarding of assets and the reliability of financial records. We believe that the internal accounting controls currently in place are adequate to meet the purpose for which they were intended. We also believe the financial statements, supporting schedules and statistical tables to be fairly presented in all material respects.

#### ACCOUNTING SYSTEM AND REPORTS

The accrual basis of accounting is used in recording financial transactions. Expenses are recorded when the liability is incurred, and revenues are recorded in the accounting period in which they are earned and become measurable. Interest earned is accrued on a monthly basis. Accounts receivable at year-end, in addition to accrued interest receivable, reflect accrued employer charges and investment proceeds due on sales that have not yet settled. Investments are recorded at fair value. Fixed assets are recorded at cost less accumulated depreciation. Under our cash management program, receipts are immediately deposited and are recorded as undistributed deposits until such time as they are allocated to member contributions, employer receivables, employer contributions, and investment income.

#### ADDITIONS TO PLAN NET ASSETS

For a retirement system to adequately fund the payment of future retirement benefits, it is necessary to accumulate sufficient assets on a regular and systematic basis. The ERS derives its revenues from the three principal sources summarized below:

|                              |                   |      |               |            | Increase (Dec | erease)  |
|------------------------------|-------------------|------|---------------|------------|---------------|----------|
|                              | <br>2003          |      | 2002          |            | Amount        | Per Cent |
| Member contributions         | \$<br>57,214,521  | \$   | 55,451,216    | \$         | 1,763,305     | 3.1 %    |
| Employer contributions       | 190,586,276       |      | 167,458,900   |            | 23,127,376    | 13.8 %   |
| Net investment income (loss) | <br>146,140,751   | **** | (503,995,093) | ********** | 650,135,844   | 129.0 %  |
| Total                        | \$<br>393,941,548 | \$   | (281,084,977) | \$         | 675,026,525   | 240.2 %  |

Member contributions increased due to higher salaries even though the number of active members in the Contributory Plan declined by almost 6.1%. Based on the current membership structure, the number of active employees in Contributory Plan will continue to decline as most new members are required to join the Noncontributory Plan.

State and county government employer contributions for the fiscal years ended June 30, 2003 and 2002 were based on June 30, 2000 and 1999 actuarial valuation reports, respectively. Increases in employer contributions in FY 2003 are primarily the result of a 1999 law that diverted ERS actuarial investment earnings to reduce the State and county governments' contributions to the ERS in FY 2002.

#### **DEDUCTIONS TO PLAN NET ASSETS**

The primary purpose of the ERS is to provide retirement, disability and survivor benefits to qualified members and their beneficiaries. The cost of this program includes recurring pension benefit payments,

the refund of contributions (plus interest) to new retirees and former members, and the cost to administer the ERS. Expenses for the past two fiscal years are shown below:

|   |            |             |                   | <br>Increase (D  | ecrease) |
|---|------------|-------------|-------------------|------------------|----------|
|   |            | 2003        | <br>2002          | <br>Amount       | Per Cent |
| Benefits  | \$         | 602,805,080 | \$<br>565,559,305 | \$<br>37,245,775 | 6.6 %    |
| Refund of member contributions to former members  |            | 2,605,602   | 3,244,334         | (638,732)        | (19.7)%  |
| Refund of contributions appropriated to employers |            | 2,800       | -                 | 2,800            | 100.0 %  |
| Administrative expenses                           | ********** | 6,780,824   | <br>5,754,832     | <br>1,025,992    | 17.8 %   |
| Total   | \$         | 612,194,306 | \$<br>574,558,471 | \$<br>37,635,835 | 6.6 %    |

The increase in benefit payments reflects an increase in the number of retirees, the annual post retirement benefit increase, and a one-time lump sum \$200 bonus payment to 9,232 retirees, age 70 years or older with at least 20 years of credited service as a result of Act 233/2002. Administrative expenses are detailed in the Financial Section of the CAFR.

#### **INVESTMENTS**

The Board of Trustees has diversified the ERS' investment portfolio to secure consistent, positive long-term investment returns while preserving capital. The diversification of investments through a long-term asset allocation strategy is generally regarded as the most important decision made in the investment process. Studies have indicated that over 85% of the variability in investment returns can be attributed to the asset allocation decision. A summary of the ERS' long-term asset allocation strategy can be found in the Investment Section of this report, in addition to a report by our Chief Investment Officer and investment consultant.

Professional investment managers have been retained to execute the Board's investment strategies and have full discretion within statutory provisions, Board policies and their respective guidelines. The investment managers retained by the Board as of June 30, 2003 are listed in the Investment Section.

Although the ERS had a 2.97% investment return in FY 2003 as compared with the negative returns in FY 2001 and FY 2002, it still fell short of the statutory 8% investment yield assumption. However, with the end of the war in Iraq, the lowest interest rates in more than four decades, major tax cuts, and improving corporate profits, we are hopeful for a stock market rebound in FY 2004.

#### **FUNDING STATUS**

The overall objective of ERS is to accumulate sufficient assets to meet current and future retirement, disability and death benefit obligations to retirees and beneficiaries. The greater the level of funding, the larger the ratio of assets accumulated to the actuarial accrued liability and the greater the level of investment potential. The funded ratio on an actuarial basis was 75.9% and 84.0% as of June 30, 2003 and June 30, 2002, respectively. When using the fair value of assets, the funded ratio on June 30, 2003 was approximately 64.3%. A detailed discussion of the funding method is provided in the Actuarial Section of this report.

#### PROFESSIONAL SERVICES

Professional consultants are appointed by the Board of Trustees to perform professional services that are essential to the effective and efficient operation of the ERS. Opinions from the certified public accounting firm, Grant Thornton LLP, and the actuary, Gabriel, Roeder, Smith & Company, are included in this report. Callan Associates Inc. is our investment consultant and their report on the ERS' investment program and performance results are also included in this report.

#### **MAJOR EVENTS/INITIATIVES**

During the past year, several major lawsuits, new legislative initiatives, and a 40 percent increase in the number of members filing for retirement caused a strain on our resources. The large number of "baby boomers" who will begin to retire in the near future will further aggravate the situation. In fact, almost 10,000 members or 16% of our active members are already eligible to retire. To help us meet these challenges, the Legislature recently approved additional staff positions and funding for the design and installation of a new computer system to replace our antiquated Wang system.

A new retirement benefit calculator for Noncontributory Plan members was installed on our website in June 2003. We also added more retirement information, financial reports, and forms on our website. This has reduced the number of telephone calls and letters from our members and we are now averaging over 7,000 hits on our website each month.

The 2003 Legislature requested a study on the feasibility of allowing Contributory Plan members the opportunity to join the proposed hybrid contributory plan. The Legislature also requested a study on the feasibility of establishing a Deferred Retirement Option Plan for firefighters and police officers. Both studies are to be presented to the 2004 Legislature.

#### **ACKNOWLEDGEMENTS**

This report represents the dedicated collaborative efforts of ERS staff and consultants to provide extensive and reliable information as a basis for making management decisions, determining compliance with legal provisions, and for determining responsible stewardship of the assets contributed by the ERS' members and their employers. The report will be provided to legislators, State and county officials, and other interested parties.

We would like to take this opportunity to express our gratitude to the Board of Trustees, the Staff, the advisors, and to the many people who work so diligently to help our members.

Sincerely,

David Shimabukuro Administrator

The Board of Trustees is the governing body of the Employees' Retirement System of the State of Hawaii, with certain areas of administrative control vested in the State Department of Budget and Finance.

Four of the eight members on the Board are elected by the membership: two general employees, a teacher and a retiree. Three members are citizens of the State, one of whom is an officer of a bank authorized to do business in the State or a person of similar experience, who are not employees and are appointed by the Governor. The State Director of Finance is an ex-officio member by statute.

#### **PLAN SUMMARY**

The Employees' Retirement System (ERS) of the State of Hawaii was established by the Legislature in 1925 to provide retirement, disability and survivor benefits for State employees, teachers, professors, county employees, police officers, firefighters, judges and elected officials.

The ERS is a qualified defined benefit pension plan under Section 401(a) of the Internal Revenue Code. As such, the ERS is exempt from federal income taxation on its investment earnings. Since January 1, 1988, member contributions have been tax deferred under Section 414(h) of the Internal Revenue Code.

Members are covered by the provisions of the Contributory or Noncontributory retirement plan. Those in the Contributory Plan are required to make contributions to the ERS and may also be covered by Social Security. Employees in the following occupational groups are required to be members of the Contributory Plan: police officers, firefighters, judges, elected officials, legislative officers, State and County department heads and deputies, attorney general investigators, and narcotics enforcement investigators. As of March 31, 2003, 9,983 active employees were enrolled in the Contributory Plan, or 16% of our active members.

Members of the Noncontributory Plan do not make contributions to the ERS and must be covered by Social Security. The Noncontributory Plan covers most employees hired from July 1, 1984, as well as employees hired before that date who elected to join the plan. As of March 31, 2003, there were 52,309 active employees in the Noncontributory Plan, which represents almost 84% of all active members. Since most new employees are required to become members of the Noncontributory Plan, these numbers will continue to increase.

A summary of the general retirement benefits for Contributory and Noncontributory members is on the following pages. The retirement options are also included.

### SUMMARY OF RETIREMENT BENEFIT PLAN PROVISIONS

|   | Noncontributory Plan   | Contributory Plan  |  |  |
|---|--|--|--|--|
| <b>Employee Contributions</b>             | No employee contributions  | 7.8% of salary   |  |  |
| Normal Retirement Eligibility             | Age 62 and 10 years credited service  or  Age 55 and 30 years credited service   | Age 55 and 5 years credited service  |  |  |
| Benefit                                   | 1-1/4% of average final compensation times years of credited service (Average final compensation or AFC is an average of the highest salaries during any three years of credited service, excluding any salary paid in lieu of vacation or if ERS membership occurred prior to 1/1/71, AFC may be an average of the highest salaries during any five years of credited service including any salary paid in lieu of vacation.) | 2% of average final compensation times years of credited service (Average final compensation or AFC is an average of the highest salaries during any three years of credited service, excluding any salary paid in lieu of vacation or if ERS membership occurred prior to 1/1/71, AFC may be an average of the highest salaries during any five years of credited service including any salary paid in lieu of vacation.) |  |  |
| Early Retirement Eligibility              | Age 55 and 20 years credited service   | Any age and 25 years credited service  |  |  |
| Benefit                                   | Maximum allowance reduced 6% per year under age 62   | Maximum allowance reduced 5% per year under age 55 plus 4% per year under age 50   |  |  |
| Deferred Retirement Requirements          | 10 years credited service  | 5 years credited service and contributions left in the ERS   |  |  |
| Benefit                                   | Accrued maximum allowance payable at age 65  | Accrued maximum allowance payable at age 55  |  |  |
| <b>Ordinary Disability</b><br>Eligibility | 10 years credited service  | 10 years credited service  |  |  |
| Benefit                                   | Accrued maximum allowance unreduced for age  | 1-3/4% AFC for each full year of credited service with a minimum of 30% AFC unreduced for age  |  |  |

#### Noncontributory Plan

#### **Contributory Plan**

Service-Connected Disability (due to accident on the job)

Eligibility

Any age or credited service

Any age or credited service

Benefit

Accrued maximum allowance, but not less than 15% AFC unreduced for age

50% of AFC unreduced for age, and return of contributions for accidents after July 7, 1998.

For accidents prior to July 8, 1998: Totally disabled: lifetime pension of 66-2/3% AFC plus annuity, unreduced for age.

Occupationally disabled: same benefit (66-2/3% of AFC plus annuity) paid for 3 years and then pension is reduced to 33-1/3% AFC if not totally disabled, unreduced for age.

**Ordinary Death** 

Eligibility

Active employee at time of death with at least 10 years of credited service

Active employee at time of death with at least 1 year of service

Benefit

Surviving spouse and dependent children receive a benefit equal to a percentage of member's accrued maximum allowance unreduced for age or if member was eligible for retirement at the time of death, Option B (100% Joint and Survivor) benefit for surviving spouse and a percentage of member's accrued maximum allowance unreduced for age for the dependent children

Return of member's contributions and accrued interest plus a percentage of the salary earned in the 12 months preceding death or Option 2 (100% Joint and Survivor) benefit if member was eligible for retirement at the time of death and one beneficiary designated or Option 3 (50% Joint and Survivor) benefit if member was not eligible for retirement at the time of death, credited with 10 years of service, and one beneficiary designated

Service-Connected Death (due to accident on the job)

Eligibility

Any age or service

Any age or service

Benefit

Surviving spouse and dependent children receive pension equal to a percentage of member's accrued maximum allowance, based on minimum accrued maximum allowance of 30% AFC

Return of member's contributions, and accrued interest plus pension of 50% AFC to surviving spouse, dependent children or dependent parents

The plan provisions summarized above apply to teachers and most State and County employees. Special provisions applicable to other groups of employees are outlined below:

- A) Police officers, firefighters, investigators of the Department of the Prosecuting Attorney and the Attorney General, and narcotic enforcement investigators, contribute 12.2% of their monthly salary to the ERS instead of 7.8%. These members may retire at age 55 with 10 years of credited service or at any age with 25 years of credited service and receive a retirement benefit of 2-1/2% of average final compensation (AFC) for each year of such service up to a maximum of 80% AFC, provided the last 5 years is credited service in any of these occupations.
- B) Judges, elected officials, and legislative officers may retire at age 55 with at least 5 years of credited service, or at any age with at least 10 years of credited service and receive a pension of 3-1/2% of AFC for each year of such service plus an annuity from their contributions allocable to the period of such service. This benefit cannot exceed 75% of the AFC. Judges hired after June 30, 1999 need 25 years of credited service in order to retire before age 55.
- C) Sewer workers in specified classifications and water safety officers may retire at any age if they are credited with 25 years of such service with the last 5 or more years in these occupations.
- D) Emergency medical technicians (EMT) may retire at any age if they are credited with 30 years of such service with the last 5 or more years in these occupations effective June 30, 2003. The years of service to qualify for early retirement is gradually being reduced through June 30, 2008 when 25 years of EMT service will qualify these members for early retirement.

#### Post Retirement Benefit

Each retiree's original retirement allowance is increased by 2.5% on each July 1 beginning the calendar year after retirement. This cumulative benefit is not compounded and increases each year by another 2.5% of the original retirement allowance without a ceiling (i.e., 2.5% of the original retirement allowance the first year, 5% the second year, 7.5% the third year, etc.).

#### **Taxation of Benefits**

All retirement benefits are subject to Federal income taxes but are exempt from Hawaii State income tax. Certain occupational (work related) disability benefits are exempt from Federal income taxes for Contributory Plan members. Arrangements to initiate voluntary withholding of Federal income tax can be made at any time. The ERS also provides retirees with a 1099-R tax form on or before January 31 of each year.

#### **Additional Benefits**

Retirees, their spouses and dependent children under age 19 are eligible to receive life insurance, medical, dental, vision, and prescription drug coverage from the Employer-Union Health Benefits Trust Fund (EUTF) if they were hired before July 1, 1996, and retire with at least 10 years of credited service. If they were first hired after June 30, 1996, health benefits are available on a cost-sharing basis as long as the member retires with at least 10 years of service. A dependent of a retiree who is a full-time student at an accredited college, university or technical school and who is 19 through 23

years old is also eligible for coverage. A retiree with a hire date after July 1, 2001 will only receive coverage for him or herself.

Unused sick leave is excluded from credited service in determining health benefit coverage.

Retirees will be responsible for premiums in excess of the amount of employer contributions. Retirees and their spouses are also eligible to receive a reimbursement of the Medicare Part B medical insurance premium. More information is available on the EUTF's website at <a href="http://www.eutf.hawaii.gov">http://www.eutf.hawaii.gov</a>.

#### **Applying for Retirement**

A service retirement application can be filed with the ERS 150 days but no less than 30 days prior to the effective date of retirement. Once the application has been filed, cancellation prior to the effective date of retirement is permitted; however, the law requires mandatory retirement upon the third application. Members residing on the neighbor islands may obtain retirement information and application forms at the following locations:

Hawaii District Office 101 Aupuni Street, Suite 203 Hilo, Hawaii 96720 Kauai District Office 3060 Eiwa Street, Room 302 Lihue, Hawaii 96766

Maui District Office 54 S. High Street, Room 218 Wailuku, Hawaii 96793

#### **Counseling Service**

It is the policy of the ERS to render every possible service to its members; however, as thousands of inquiries are received and answered annually, in addition to the actual processing of claims and benefits, present staff and appropriations restrict this service to those members whose immediate welfare is dependent upon the prompt settlement of benefits. Members who are not planning immediate retirement but who are interested in their benefit status, should contact the ERS for the estimate worksheets that will enable them to do their own calculations. Members who are definite about retirement should contact the ERS to request formal retirement estimates. A retirement benefit calculator for members and other retirement information are also available on the ERS' website at http://www2.state.hi.us/ers/.

#### RETIREMENT OPTIONS

#### CONTRIBUTORY PLAN

**Maximum Allowance**: The member receives a lifetime maximum allowance and at death, the difference between the value of the member's contributions at the time of retirement and the retirement allowance paid prior to death is paid to the designated beneficiary(ies) or estate.

**Option One**: The member receives a reduced lifetime allowance based on age and at death, the difference between the initial insurance reserve and the retirement allowance paid prior to death is paid to the designated beneficiary(ies) or estate.

Option Two (100% Joint and Survivor): The member receives a reduced lifetime allowance based on ages of both the member and the sole beneficiary and at death, the same allowance is paid to the designated beneficiary for life. Should the designated beneficiary predecease the retiree, another beneficiary cannot be named and all payments will cease at the retiree's death.

Option Three (50% Joint and Survivor): This plan is similar to Option Two. The member receives a reduced lifetime allowance which is higher than Option Two and is based on ages of both the member and the sole beneficiary; however, at death one-half of the allowance is paid to the designated beneficiary for life. Like Option Two, should the designated beneficiary predecease the retiree, another beneficiary cannot be named and all payments will cease at the retiree's death.

**Option Four**: This option allows the member to devise a plan that will provide a benefit according to the member's specifications. It requires certification by the Actuary and approval of the Board of Trustees. The following Option Four plans have been approved:

Combination of Options Five and Maximum Allowance. The member receives a reduced lifetime allowance and is allowed to withdraw the pre-1987 nontaxable contributions, 50% of accumulated contributions, or 75% of accumulated contributions; at death, the difference between the value of the member's contributions at the time of retirement and the retirement allowance paid prior to death is paid to the designated beneficiary(ies) or estate.

Combination of Options Five and One. The member receives a reduced lifetime allowance and is allowed to withdraw the pre-1987 nontaxable contributions, 50% of accumulated contributions, or 75% of accumulated contributions; at death, the difference between the initial insurance reserve and the retirement allowance paid prior to death is paid to the designated beneficiary(ies) or estate.

Combination of Options Five and Two. The member receives a reduced lifetime allowance based on ages of both the member and the sole beneficiary, and is allowed to withdraw the pre-1987 nontaxable contributions, 50% of accumulated contributions, or 75% of accumulated contributions; at death, the same allowance is paid to the designated beneficiary for life. As in the case of Option Two, should the designated beneficiary predecease the retiree, another beneficiary cannot be named and all payments will cease at the retiree's death.

Combination of Options Five and Three. The member receives a reduced lifetime allowance based on ages of both the member and the sole beneficiary, and is allowed to withdraw the pre-1987 nontaxable contributions, 50% of accumulated contributions, or 75% of accumulated contributions; at death, one-half of the allowance is paid to the designated beneficiary for life. As in the case of Option Three, should the designated beneficiary predecease the retiree, another beneficiary cannot be named and all payments will cease at the retiree's death.

**Option Five**: The member receives a reduced lifetime allowance and is allowed to withdraw all accumulated contributions; at death, the prorated amount from the last pension payment through the date of death is payable to the beneficiary(ies) or estate.

Option Four and Option Five are restricted to those members with at least ten years of credited service excluding unused sick leave credit.

Regardless of the option selected, should death occur during the first year of retirement, the designated beneficiary may elect to receive benefits as if death had occurred immediately prior to retirement in lieu of the death benefits described above.

#### NONCONTRIBUTORY PLAN

Maximum Allowance: The member receives a lifetime pension and at death, the prorated amount from the last pension payment through the date of death is payable to the beneficiary(ies) or estate.

**Option A (50% Joint and Survivor)**: The member receives a reduced lifetime pension and at death, one-half of the pension is paid to the sole designated beneficiary for life. Should the designated beneficiary predecease the retiree, another beneficiary cannot be named and all payments will cease upon the retiree's death.

Option B (100% Joint and Survivor): The member receives a reduced lifetime pension and at death, the same pension is paid to the sole designated beneficiary for life. Like Option A, should the designated beneficiary predecease the retiree, another beneficiary cannot be named and all payments will cease upon the retiree's death.

Option C (Ten-Year Guarantee): The member receives a reduced lifetime pension. Should death occur within ten years of retirement, the same pension will be paid to the designated beneficiary for the balance of the ten-year period. Should the designated beneficiary predecease the retiree, another beneficiary can be named.

#### **LEGISLATIVE HIGHLIGHTS 2003**

The following Acts, sponsored by the ERS or other agencies or parties, were passed by the 2003 Legislature and approved by the Governor:

#### Act 118, effective July 1, 2003

- Repeals the provisions of Act 128, which changed the methodology of computing the "High 3" and "High 5" average final compensation to the highest three calendar years or highest three school contract years or the last 36 credited months. This act reinstates the old "High 3" and "High 5" average final compensation methodology retroactive to January 1, 2003.
- Specifies that the full monthly pension in the month a pensioner dies, will be payable to the pensioner instead of the beneficiary effective July 1, 2003.

#### Act 119, effective July 1, 2003

 Allows certain positions at the University of Hawaii to be aggregated to meet ERS eligibility requirements.

#### Act 121, effective July 1, 2003

Requires nonresident aliens on visas who are excluded from Social Security coverage to be enrolled in the Noncontributory Plan beginning January 1, 2004. This new law streamlines enrollment processing, eliminates class code changes and the refunding of member contributions when visa status changes occur.

#### Act 134, effective July 1, 2003

- Requires the ERS to pay retirees 4.5 per cent interest per annum for delays in finalizing their pensions. Interest begins after the sixth calendar months following the month of retirement effective January 1, 2004.
- Requires ERS to assess departments \$10 per month for delays in providing retirement information. Unused sick leave and vacation pay must be provided to the ERS within 90 days of a member's retirement date. Requests for other retirement information must be answered within 30 days to avoid the monthly assessment.

#### Act 182, effective January 1, 2004

Oirects the ERS to provide written notification of a member's retirement date, option selection, and beneficiary designation to the member's spouse/reciprocal beneficiary.

#### Act 199, effective June 24, 2003

- Provides an early retirement benefit with no age reduction penalty for Contributory and Noncontributory Emergency Medical Technicians (EMT).
- Graduated phase-in starting June 30, 2003 for those with 30 years of EMT service through July 1,
   2008 when 25 years of EMT service will qualify these members for early retirement.

#### Report of Independent Certified Public Accountants

Board of Trustees Employees' Retirement System of the State of Hawaii

We have audited the accompanying combining statements of plan net assets of the Employees' Retirement System of the State of Hawaii (System) as of June 30, 2003 and 2002, and the related statements of changes in plan net assets for the years then ended. These financial statements are the responsibility of the System's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the plan net assets of the System as of June 30, 2003 and 2002, and the changes in plan net assets for the years then ended in conformity with accounting principles generally accepted in the United States of America.

Suite 1000 1137 Bishop Street Physiolau HB 968137830 Tel: 808 536-0044 Fax: 808 523-8540 Board of Trustees Employees' Retirement System of the State of Hawaii

In accordance with Government Auditing Standards, we have also issued our report dated October 25, 2003 on our consideration of the System's internal control over financial reporting and our tests of its compliance with certain provisions of laws, regulations, contracts and grants. That report is an integral part of an audit performed in accordance with Government Auditing Standards and should be read in conjunction with this report in considering the results of our audit.

The management's discussion and analysis on pages 22 through 27 and the supplementary information for defined benefit pension plans on pages 44 and 45 are not a required part of the basic financial statements, but is supplementary information required by the Governmental Accounting Standards Board. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the supplementary information. However, we did not audit the information and do not express an opinion on it.

Our audit was conducted for the purpose of forming an opinion on the basic financial statements of the System taken as a whole. The supplementary information included on pages 46 through 50 is presented for purposes of additional analysis and is not a required part of the basic financial statements. Such information has been subjected to the auditing procedures applied in our audit of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as whole.

#### MANAGEMENT'S DISCUSSION AND ANALYSIS

For the fiscal year ended June 30, 2003

This section presents management's discussion and analysis of the Employees' Retirement System of the State of Hawaii's (ERS and the System) financial position and performance for the fiscal year ended June 30, 2003. It is presented as a narrative overview and analysis. Please read it in conjunction with the Letter of Transmittal included in the Introductory Section, the financial statements and other information which are presented in the Financial Section of this Comprehensive Annual Financial Report.

ERS is responsible for administering a defined benefit pension plan for State, local government and public education employees in the State of Hawaii. The System also oversees short-term investment of the federal social security employer contributions for the State of Hawaii in the Social Security Contribution Fund.

#### Financial Highlights

- ERS retirement plan net assets decreased by a little over \$218.3 million to \$7.7 billion at June 30, 2003 from \$7.9 billion at June 30, 2002. The decrease is primarily attributed to the payment of pension benefits that exceeded the sum of investment returns and employee and employer contributions.
- ° The rate of return for the fiscal year ended June 30, 2003 (FY2003) was 3.0% compared to the fiscal year ended June 30, 2002 return of a negative 5.5%.
- ° No significant legislation was enacted during the 2003 legislative session that has a material impact on the financial position of the Fund. See the "Pension Plan Changes" later for a summary of the legislative changes that affect the System and its membership.
- The actuarial funded ratio as of the latest valuation dated June 30, 2003 decreased to 75.9% from 84.0% as of June 30, 2002. As discussed above, the decrease is due to lower than expected investments returns during the past three years and the payout of benefits greater than total contributions received.
- ° Total employee and employer contributions increased by almost \$24.9 million during the year due primarily from an increase in the employer contributions.
- <sup>o</sup> Total pension plan benefit payouts increased by 6.6% during FY2003 to \$602.8 million from \$565.6 million in FY2002. The increase is primarily due to the growth in the number of retirees and the annual post-retirement increase.
- Administrative expenses increased by 17.8% to \$6.8 million during FY2003 from \$5.8 million during FY 2002 and were within the System's budgeted amounts for both years. The major increases are attributable to a significant increase in legal services resulting from an increase in the number of lawsuits involving the ERS, an increase in salaries and wages due to an increase in the number of positions filled during the year, overtime, an increase in the fringe benefit rate for all State employees and increased repairs and maintenance due to delays in our office

automation project. These increases were offset by completion of a one-time pension benefit study completed in FY2003 as required by legislation passed in 2001, and a decrease in depreciation of equipment.

#### Overview of the Financial Statements

The ERS financial statements include fiduciary type funds that are used to account for resources held for the benefit of parties outside of ERS. The primary fund is defined as a pension trust fund as these assets are held for the benefit of our members and their beneficiaries for the payment of pension benefits, while the Contribution Fund is an agency type fund that is custodial in nature. Throughout this discussion and analysis units of measure (i.e. billions, millions, and thousands) are approximate, being rounded up or down to the nearest tenth of the respective unit value.

This discussion and analysis is intended to serve as an introduction to the ERS financial reporting which is comprised of the following components

- The Statements of Plan Net Assets provide a snapshot of the financial position of the System at June 30, 2003 and June 30, 2002. These financial statements reflect the resources available to pay benefits to members, including retirees and beneficiaries, at the end of the fiscal years reported.
- The Statements of Changes in Plan Net Assets summarize ERS' financial activities that occurred during the fiscal period from July 1, 2002 to June 30, 2003 (FY2003), and comparative amounts for the previous fiscal year from July 1, 2001 to June 30, 2002 (FY2002). The financial statements measure the changes in the resources available to pay pension benefits to members, retirees and beneficiaries for fiscal years 2003 and 2002.
- The Notes to Financial Statements provide additional information that is essential to a full understanding of the financial statements. The notes are an integral part of the financial statements and include detailed information that is essential to a full understanding of the data provided in the basic financial statements.
- The Required Supplementary Information immediately following the notes to financial statements provides two schedules showing historical actuarial information concerning the funded status of ERS and the employer contributions, with related notes.
- The remaining supplementary information provides additional detailed information concerning the changes in operating funds established by legislation, and the operating and investment related expenses of the System.

#### Analysis of Plan Net Assets for Pension Trust

| Summary of Plan Net Assets             |               |            |         |

| Decrease in Plan Net Assets            | \$ (218.3)    | \$ (855.6) | 74.5 %  |

#### <u>Investments</u>

ERS is a long-term investor and manages the pension trust assets with long-term objectives in mind. A primary element of ERS' investment philosophy is that diversification among various asset classes is a prudent way to achieve its goals. ERS makes estimates of long-term market return and establishes an asset allocation plan taking into account the risk associated with each asset class as well as the financial objectives of the System.

For FY2003, the System's rate of return on pension trust investments was almost 3.0% which is primarily attributable to positive returns from the System's fixed income managers which were offset by the performance of the System's equity managers.

The asset distribution of ERS investment securities for the pension trust, excluding pending trade settlements and securities lending collateral, at June 30, 2003 and June 30, 2002 at fair market value is presented below. Please refer to the Investment Section of the CAFR for a discussion on asset allocation plan targets and investments by investment strategy.

| Asset Class             |           |               |           |        |
|-------------------------|-----------|---------------|-----------|--------|
| June 30,                |           | (dollars in t | millions) |        |
|                         | 2003      | %             | 2002      | %      |
| Short-term and cash     | \$ 521.6  | 6.5%          | \$ 309.9  | 3.9%   |
| Equity securities       | 3,356.8   | 41.8%         | 3,363.2   | 41.3%  |
| Fixed income            | 2,094.6   | 26.1%         | 2,426.9   | 29.8%  |

#### Short-term and cash

Investments in short-term securities and cash of the pension trust as of June 30, 2003 increased by \$211.7 million in comparison to holdings as of June 30, 2002. Most of these funds are held by external investment managers for the settlement of pending trades and investments.

#### Equity securities and index funds

The allocation to equity securities, including index funds, remained relatively constant during the year with total investments increasing by \$83.1 million.

#### Fixed Income

Fixed income decreased by \$332.3 million at June 30, 2003 when compared to June 30, 2002 primarily due to reductions of the asset class during FY2003 to pay for pension benefits in accordance with our asset allocation strategy. The decrease was partially offset by the positive domestic and international bond market performance during the year.

#### Real Estate and Real Estate Mortgages

The total real estate related investments decreased by \$84.7 million during FY2003 as a result of the transfer of cash from net rental activities to pay for pension obligations, the sale of several properties, and the foreclosure of delinquent mortgages.

#### Alternative Investments

Investments increased in alternative investments by \$11.1 million due to the additions of new investment partnerships and the drawdowns of commitments to existing investments in accordance

with ERS' asset allocation plan targets. The increase was partially offset by negative investment returns in the private equity markets.

#### Contributions and Investment Income

During FY 2003 contributions from employers and employees totaled \$247.8 million compared to \$222.9 million during FY2002. The increase in employer contributions of \$23.1 million is in accordance with results of the actuarial valuations dated June 30, 2000 and June 30, 1999. The increase in employer contributions also includes the cost of a one-time lump sum bonus of \$200 for certain retirees as a result of Act 233/2002. Although the number of contributory members continues to decline, receipts from members increased by approximately \$1.8 million due to increases in covered payroll for contributory members.

Net investment earnings were \$146.1 million during FY2003 compared to a loss of (\$504.0) during FY2002. Net investment income and loss also includes net income from securities lending activities as an addition and investment expenses as a deduction.

The System earns additional incremental investment income by lending investments securities to brokers. This is done on a pooled basis by ERS' custodial bank, State Street Bank (SSB). The brokers provide collateral to SSB and generally use the borrowed securities to cover short sales and failed trades. SSB invests the cash collateral received from the brokers in order to earn interest. The net securities lending income decrease by approximately \$1.0 million during FY2003 represents a decrease in the demand by brokers to borrow available securities and from lower interest rates.

Investment expenses consists primarily of investment management fees paid to external investment advisor firms that oversee the ERS investment portfolio. Total investment expenses for FY2003 increased by approximately \$0.5 million over FY2002 due to foreclosure related expenses. The increase was offset by a reduction in the investment advisor fees paid due to the termination of external managers during the year by the Board of Trustees and lower net asset values.

#### Pension Plan Benefits and Expenses

The primary source of expense during FY2003 was for the payment of pension benefits totaling \$602.8 million which compares to \$565.6 million during FY2002. Pension benefits increased 6.6% primarily due to the number of new retirees and the annual post-retirement increase. Pension benefits also included a one-time payment of \$200 to certain pensioners in accordance with Act 233/2002. Refunds of contributions decreased by 19.7% during the year and are in line with the declining number of contributory members. Administrative expenses totaled almost \$6.8 million during FY2003 compared to \$5.8 million during FY2002.

#### Pension Plan Changes

Act 118/2003 restores the method to calculate "Average Final Compensation" or AFC to the methodology used prior to January 1, 2003 (rescinding the change enacted under Act 128/2002). Act 119/2003 allows certain positions at the University of Hawaii to be aggregated for membership and benefits of the System. Act 121/2003 requires foreign nationals working in the United States on a visa

to become noncontributory members. Act 134/2002 requires the System to pay 4-1/2% interest to retirees for delays in finalizing of their pension benefit amount, and allows ERS to assess the employers a monthly fee for delays in providing certain information. Act 199/2003 provides a 6-year phase-in to unreduced retirement benefits with 25 years of service regardless of age for Emergency Medical Technicians.

The effects of these legislative changes are included in the System's actuarial valuation at June 30, 2003.

#### Actuarial Valuations and Funded Status

The System uses an actuarial reserve type of funding that is financed by member contributions, employer contributions and earnings from invested assets. An independent actuarial valuation of ERS actuarial assets and liabilities is performed annually. As part of this valuation, the progress toward funding pension obligations of the retirement system is measured by comparing the actuarial value of assets to actuarial accrued liability. This measurement is referred to as the funded ratio or funded status. The actuarial funded status declined to 75.9% as of June 30, 2003 from 84.0% as of June 30, 2002, or a decrease of 8.1%. The funded ratio decrease was the result of investment returns below the investment return assumption of 8% for the last three years.

At June 30, 2003 the System's unfunded actuarial accrued liability had increased to \$2.9 billion from \$1.8 billion as of June 30, 2002. This is an increase in the unfunded liability of almost \$1.1 billion for the year. At June 30, 2003 the difference between the actuarial value of the assets and the market value of the assets was about \$1.4 billion in actuarially deferred losses. This was a decrease of \$122.9 million in actuarially deferred losses from the \$1.5 billion actuarially deferred losses at June 30, 2002. These actuarially deferred losses will be recognized by the actuary over the next following three actuarial valuations under the actuarial asset valuation method. In the absence of offsetting gains during these three plan years, the employers' contribution requirements are expected to significantly increase.

#### NOTES TO FINANCIAL STATEMENTS

June 30, 2003 and 2002

#### NOTE A - DESCRIPTION OF THE SYSTEM

#### 1. General

The Employees' Retirement System of the State of Hawaii (System) began operations on January 1, 1926, having been established by the Territorial Legislature in the preceding year. The System is a cost-sharing, multiple-employer public employee retirement system established to administer a pension benefits program for all State and county employees, including teachers, police officers, firefighters, correction officers, judges and elected officials.

Employer, pensioner and employee membership data as of March 31,:

|   | 2003            | 2002            |
|---|-----------------|-----------------|

#### NOTE A – DESCRIPTION OF THE SYSTEM (continued)

#### 2. The Financial Reporting Entity

As required by accounting principles generally accepted in the United States of America, these financial statements present the System (the primary government) as a separate reporting entity from the State of Hawaii (State). The System is not part of the State's financial reporting entity because it is a separate legal entity that is fiscally independent of the State. The System was established by Chapter 88 of the Hawaii Revised Statutes and is governed by a Board of Trustees (Board) as discussed below. As the primary government, the System has included the Social Security Contribution Fund in its financial statements since the Social Security Contribution Fund is not a legally separate entity.

The Board administers the System on behalf of public employees of both the State and county governments. Except for limited administrative functions, the State does not have the power to supervise or control the Board in the exercise of its functions, duties and powers. The Board consists of eight members. The State Director of Finance is a statutory member of the Board. Four members of the Board are elected by members of the System and the other three members of the Board are appointed by the Governor. Decisions are made with the concurring vote of five members of the Board. The Board appoints the Administrator and Chief Investment Officer and engages actuarial and other services required to transact the business of the System.

#### 3. Benefits

Members of the System belong to either the contributory or noncontributory plan. All assets of the System (in the Pension Trust) may be used to pay benefits to any member of the System. Employees covered by Social Security on June 30, 1984 were given the option of joining the noncontributory plan or remaining in the contributory plan. All new employees hired after June 30, 1984, who are covered by Social Security, are generally required to join the noncontributory plan. Most members of the contributory plan are required to contribute 7.8% of their salary. Both plans provide a monthly retirement allowance based on the member's age, years of credited service, and average final compensation (AFC). The AFC is the average salary earned during the five highest paid years of service, including the payment of salary in lieu of vacation, or three highest paid years of service, excluding the payment of salary in lieu of vacation, if the employee became a member prior to January 1, 1971. The AFC for members hired on or after this date is based on the three highest paid years of service excluding the payment of salary in lieu of vacation. Vesting requirements for the contributory and noncontributory plans are five years and ten years, respectively.

Ordinary disability retirement benefits require a minimum of ten years of service, whereas service connected disability resulting from a job related accident does not have any service requirement. Under both plans, there is no age requirement.

Ordinary death benefits under the contributory and noncontributory plans require at least one year and ten years of service, respectively. Under both plans, there is no service requirement for service connected death benefits.

#### NOTE A – DESCRIPTION OF THE SYSTEM (continued)

#### 3. Benefits (continued)

Retirement benefits for certain groups of contributory members, such as police officers, firefighters, some investigators, sewer workers, judges and elected officials, vary from general employees. All contributions, benefits and eligibility requirements are governed by Chapter 88 of the Hawaii Revised Statutes.

Every retiree's original retirement allowance is increased by 2-1/2% on each July 1 following the calendar year of retirement. This cumulative benefit is not compounded and increases each year by 2-1/2% of the original retirement allowance without a ceiling (2-1/2% of the original retirement allowance the first year, 5% the second year, 7-1/2% the third year, etc.).

#### NOTE B - SOCIAL SECURITY CONTRIBUTION FUND

The Social Security Contribution Fund (Contribution Fund) was established under Section 88-224 of the Hawaii Revised Statutes for the following purposes:

- 1. To receive all federal social security employers' contributions from the State and interest and penalties on unpaid amounts;
- 2. To receive any appropriations to the Contribution Fund;
- 3. To pay amounts required to be paid to the Internal Revenue Service (IRS); and
- 4. Invest and collect income on resources held by the Contribution Fund.

All other governmental agencies remit social security contributions directly to the IRS. Social security contributions withheld from employees are remitted directly to the IRS by the employers.

#### NOTE C - SUMMARY OF ACCOUNTING POLICIES

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows.

#### 1. Basis of Accounting

Fiduciary funds are used to account for assets held by the System in a trustee capacity or as an agent for individuals, private organizations, other governments, and or other funds. The fiduciary fund types used by the System are a pension trust fund and an agency fund. Each of the fiduciary funds are considered a separate fiscal and accounting entity with a self-balancing set of accounts that comprise its assets, liabilities, equity, revenues and expenditures, or expenses, as appropriate. The accounting and reporting treatment applied to a fund is determined by its measurement focus. The Pension Trust Fund is accounted for on a flow of economic resources measurement focus. As an agency fund, the Contribution Fund is custodial in nature and does not measure results of operations.

# NOTE C – SUMMARY OF ACCOUNTING POLICIES (continued)

# 1. Basis of Accounting (continued)

The financial statements are prepared using the accrual basis of accounting under which expenses are recorded when the liability is incurred, revenues are recorded in the accounting period in which they are earned and become measurable. Employer and member contributions are recognized in the period in which the contributions are due. Benefits and refunds are recognized when due and payable in accordance with the terms of the plan. Investment purchases and sales are recorded as of their trade date. Administrative expenses are financed exclusively with investment income.

# 2. Investments

Pursuant to Section 88-119 of the Hawaii Revised Statutes, the System may invest in real estate loans and mortgages; preferred and common stocks; government obligations; corporate obligations; certain other debt obligations (such as obligations secured by collateral of certain other authorized securities listed here, obligations issued or guaranteed by certain development banks, insurance company obligations); real property; alternative investments; and other securities and futures contracts. The investment decision is further dictated by internal investment policies and asset allocation established by the Board of Trustees. Assets in the Pension Trust may be invested in any of these assets, while investments in the Contribution Fund are limited to investment grade, short-term marketable securities.

Investments are reported at fair value. Where appropriate, the fair value includes disposition costs. Short-term investments are reported at cost, which approximates fair value. Securities (categorized as fixed-income, equity, index funds, and alternative investments) traded on a national or international exchange are valued at the last reported sales price at current exchange rates. Mortgages are valued on the basis of future principal and interest payments. The fair value of real estate investments is based on independent appraisals and estimated values. Investments that do not have an established market are reported at estimated fair value.

# 3. Interest and Earnings Allocation

Pursuant to Section 88-21 and 88-107 of the Hawaii Revised Statutes, the Board shall annually allocate interest and other earnings of the System to the funds of the System, as follows:

- a. Annuity Savings Fund Fixed at 4-1/2% regular interest rate.
- b. Expense Fund To be credited all money to pay the administrative expenses of the System.
- c. Pension Accumulation Fund To be credited with any remaining investment earnings.

# NOTE C – SUMMARY OF ACCOUNTING POLICIES (continued)

# 4. Risk Management

The System reports liabilities, as discussed in note G, related to certain types of losses (including torts, theft of, damage to, or destruction of assets, errors or omissions, natural disasters and injuries to employees) when it is probable that the losses have occurred and the amount of those losses can be reasonably estimated.

# 5. Use of Estimates

In preparing financial statements in conformity with accounting principles generally accepted in the United States of America, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

# 6. Reclassifications

Certain reclassifications have been made to the 2002 financial statements to conform to the 2003 presentation.

# NOTE D - DESCRIPTION OF FUNDS

Section 88-109 of the Hawaii Revised Statutes requires the establishment and maintenance of specific funds. The funds in the Pension Trust and their purposes are described hereunder:

# 1. Pension Accumulation Fund

To accumulate contributions made by the State and counties, transfers of retired members' contributions plus related interest income from the Annuity Savings Fund and income from investments. All pension benefits, including the pensioners' bonus are paid through this Fund.

# 2. Annuity Savings Fund

To accumulate members' contributions and related interest income. Upon a member's retirement, the accumulated contributions and related interest income are transferred to the Pension Accumulation Fund or refunded to the member upon termination.

# 3. Expense Fund

To pay all the expenses necessary in connection with the administration and operation of the System. The Board estimates the amount of money necessary to be paid into the expense fund for the ensuing biennium to provide for the expense of operation of the System, and pays that amount into the expense account from the investment earnings of the System, subject to review by the legislature and approval by the Governor.

# NOTE D – DESCRIPTION OF FUNDS (continued)

Net assets held in trust for pension benefits as of June 30, are as follows:

|   | 2003            | 2002            |
|---|-----------------|-----------------|
| Pension Accumulation Fund                           | \$6,768,638,086 | \$6,977,024,613 |
| Annuity Savings Fund                                | 906,504,024     | 915,247,830     |
| Expense Fund  | 12,057,773      | 13,180,198      |
| Total net assets held in trust for pension benefits | \$7,687,199,883 | \$7,905,452,641 |

# NOTE E - CONTRIBUTIONS

The System's funding policy provides for periodic employer contributions at actuarially determined rates, expressed as a percentage of annual covered payroll, such that the employer contributions, along with employee contributions and an actuarially determined rate of investment return, are adequate to accumulate sufficient assets to pay benefits when due. The funding method used to calculate the total employer contribution required is the entry age normal actuarial cost method. Under this method, the total employer contribution is comprised of the "normal cost" plus the level annual payments required to amortize the unfunded actuarial accrued liability over the closed period ending June 30, 2029. The employer normal cost is the level percentage of payroll contribution required to pay all benefits. Actuarial gains and losses resulting from differences between actual and assumed experience are reflected in the employer unfunded accrued liability.

Most members of the contributory plan are required to contribute 7.8% of their salary. Police officers, firefighters, investigators of the department of prosecuting attorney and the attorney general, narcotics enforcement investigators, and public safety investigators are required to contribute 12.2% of their salary.

Employer and member contributions are governed by Chapter 88 of the Hawaii Revised Statutes. The annual required employer contributions for the years ended June 30, 2003 and 2002 were determined as part of actuarial valuations dated June 30, 2000 and 1999, respectively.

# NOTE F - CASH DEPOSITS AND INVESTMENTS

The System's policy is to invest cash in excess of operating requirements in income-producing investments. The carrying amount of the System's total deposits (including those classified as short-term investments) as of June 30, 2003 and 2002, net of a bank overdraft of \$13,405,231 and \$3,536,795, was \$143,815,312 and \$51,973,519 (which includes cash and time deposits of \$145,432,343 and \$30,923,302), respectively. Total bank balances of these deposits amounted to \$158,597,098 and \$56,399,655, respectively. Of the bank balances, \$2,111,435 and \$2,540,877, respectively, was covered by the Federal Deposit Insurance Corporation or by collateral held by the System or by its agent in the System's name, and \$156,485,663 and \$53,858,778, respectively, was uninsured and uncollateralized. The uninsured and uncollateralized balances are primarily U.S. dollar equivalents of foreign cash held for the purpose of settling transactions.

The System's investments are categorized to give an indication of the level of risk assumed at fiscal year end. The three categories of credit risk are:

- Category 1 includes investments that are insured or registered, or for which the securities are held by the System or its agent in the System's name.
- Category 2 includes uninsured and unregistered investments for which the securities are held by the counterparty's trust department or agent in the System's name.
- Category 3 includes uninsured and unregistered investments for which the securities are held by the counterparty or by its trust department or agent, but not in the System's name.

The System's investments that can be categorized within these guidelines meet the criteria of category 1. A security, for purposes of classification in the above categories, is a transferable financial instrument that evidences ownership or creditor status. "Securities" do not include investments made with another party, real estate or direct investments in mortgages. Investments in mutual funds, limited partnerships, and commingled trust funds also are not considered securities for purposes of credit risk classification. Such investments are shown in the schedule on the below as "not subject to classification."

The following table summarizes the risk categories and fair values of investments held by the System as of June 30,:

|  | 2003 (in t  | housands)   | 2002 (in tl | nousands)   |
|--|-------------|-------------|-------------|-------------|
|  | Category 1  | Fair value  | Category 1  | Fair value  |
| Short-term securities:                         |             |             |             |             |
| U.S. Treasury issues                           | \$ 5,137    | \$ 5,137    | \$ 891      | \$ 891      |
| Commercial paper                               | 79,216      | 79,216      | 920         | 920         |
| Certificates of deposit                        | 145,232     | 145,232     | 30,723      | 30,723      |

Short-term securities and part of the pooled funds and other are reported as short-term investments in the accompanying combining statements of plan net assets.

The following manager held investments at fair value in excess of 5% of the System's net asset held in trust for pension benefits as of June 30,:

|                                   | 2003          | 2002          |
|-----------------------------------|---------------|---------------|
| Mellon Enhanced Equity Index Fund | \$876,077,475 | \$790,056,063 |

# 1. Derivative Investments

The System enters into various derivative investment contracts to hedge, reduce costs and enhance liquidity. As with any investment, derivative contracts are subject to various types of credit and market risks. Notably, these would include the possible inability of a counterparty to meet the terms of the contract, changes in the market value of the underlying collateral, or changes in the interest rate environment. Certain of the System's investments in derivative securities and contracts and their associated credit and market risks are described as follows:

# Forward Currency Exchange Contracts

The System enters into various forward currency exchange contracts to manage exposure to changes in foreign currency exchange rates and to facilitate the settlement of foreign security transactions. A forward contract is an agreement to buy or sell a specific amount of currency at a specific delivery or maturity date for an agreed-upon price. Risks associated with such contracts include movements in the value of the foreign currency relative to the U.S. dollar and the ability of the counterparty to perform in accordance with the terms of the contract. Changes in the market value of open and closed forward contracts are recorded as net appreciation in fair value of investments in the statement of changes in plan net assets. The fair value of forward currency exchange contracts outstanding at June 30, is as follows:

|   | 2003                            | 2002                            |
|---|---------------------------------|---------------------------------|
| Forward currency purchases Forward currency sales | \$ 479,627,480<br>(478,131,674) | \$ 545,095,222<br>(553,181,281) |
| Unrealized gains (losses)                         | \$ 1,495,806                    | \$ (8,086,059)                  |

# Mortgage-Backed Securities

As of June 30, 2003 and 2002, the fair value of mortgage-backed securities issued or backed by the U.S. government or its agencies, or corporate issues rated AAA by at least one of the major rating agencies was \$519,442,061 and \$617,513,612, respectively. A mortgage-backed security depends on the underlying pool of mortgage loans to provide the cash flow to make principal and interest payments on the security. Therefore, they are sensitive to

# 1. Derivative Investments (continued)

# Mortgage-Backed Securities

prepayments by mortgagees, which may result from a decline in interest rates. For example, if interest rates decline and homeowners refinance mortgages, thereby pre-paying the mortgages underlying these securities, the cash flows from interest payments are reduced and the value of these securities declines. Conversely, if homeowners pay on mortgages longer than anticipated, the cash flows are greater and the return on the investment would be higher than anticipated. A collateralized mortgage obligation (CMO) is a mortgage-backed security that is comprised of classes of bonds created by prioritizing the cash flows of the underlying mortgage pool. As of June 30, 2003 and 2002, the fair value of CMO securities was \$100,943,312 and \$151,998,511, respectively.

# 2. Securities Lending

The System participated in a securities lending program administered by its bank custodian. Under this program, which is permissible under Chapter 88 of the Hawaii Revised Statutes, certain equity and fixed income securities of the System were lent to participating brokerdealers and banks (borrowers). In return, the System received cash, securities issued or guaranteed by the U.S. government and/or letters of credit as collateral. The System did not have the ability to pledge or sell collateral securities absent of borrower default. Borrowers were required to deliver collateral for each loan equal to: (a) in the case of loaned securities denominated in U.S. dollars or whose primary trading market was located in the U.S., 102% of the market value of the loaned securities; and (b) in the case of loaned securities not denominated in U.S. dollars or whose primary trading market was not located in the U.S., 105% of the market value of the loaned securities. The collateral was marked to market daily. If the market value of the collateral fell below the minimum collateral requirements, additional collateral was provided. Securities on loan for cash collateral are presented as unclassified in the preceding schedule of custodial credit risk; securities on loan for securities collateral are classified according to the underlying security. At June 30, 2003 and 2002, the System had no credit risk exposure to borrowers because the market value of collateral held by the System exceeded the market value of securities loaned. As of June 30, 2003 and 2002, the market value of securities loaned amounted to approximately \$469,589,342 and \$477,069,815, respectively, and the associated collateral amounted to approximately \$486,040,925 and \$489,657,768, respectively. In addition, the bank custodians indemnified the System by agreeing to purchase replacement securities or return cash collateral in the event the borrower failed to return the loaned security or pay distributions.

The System did not impose any restrictions on the amount of loans the bank custodian made on behalf of the System. Also, the System and the borrowers maintained the right to terminate securities lending transactions on demand. As such, the maturities of the investments made

# 2. Securities Lending (continued)

with cash collateral generally did not match the maturities of the securities loans. The extent of such mismatch as of June 30, 2003 and 2002 was 62 and 71 days, respectively.

# 3. Foreign Investments

The fair value of the System's investments in foreign equity and fixed income securities as of June 30, is as follows:

|   | 2003                           | 2002                           |
|---|--------------------------------|--------------------------------|
| Foreign equity securities Foreign fixed income securities | \$1,045,636,632<br>616,089,286 | \$1,034,224,793<br>747,631,789 |
|   | \$1,661,725,918                | \$1,781,856,582                |

# NOTE G – RISK MANAGEMENT

The System is exposed to various risks of loss related to torts; theft of, damage to, or destruction of assets; errors or omissions; natural disasters; and injuries to employees. As required by state law, the System participates in coverage with the State of Hawaii. The State retains various risks and insures certain excess layers with commercial insurance policies. The excess layers are consistent with the prior fiscal year. Settled claims for the State have not exceeded the coverage provided by commercial insurance policies in any of the three fiscal years prior to June 30, 2002. Losses not covered by insurance are generally paid from legislative appropriations.

# 1. Torts

The System is involved in various litigation and claims, including claims regarding retirement benefits, the outcome of which cannot be presently determined, and as discussed in note I. In the opinion of management, the outcome of these actions will not have a material adverse effect on the System's financial position.

# 2. Property and Liability Insurance

The System also purchased property and liability insurance for all real estate owned from outside carriers. During the past three fiscal years, no loss settlements exceeded insurance coverages.

# 3. Workers' Compensation Policy

The State has a self-insured workers' compensation policy. Workers' compensation claims are paid from legislative appropriations.

# NOTE H - COMMITMENTS

In the normal course of business, the System enters into commitments with associated risks. The System adheres to the same credit policies, financial and administrative controls and risk limiting and monitoring procedures for these commitments as for all investments.

The System has future financial commitments of up to an additional \$183,444,000 in real estate and \$160,994,000 in alternative investments as of June 30, 2003.

# NOTE I – CONTINGENCIES

In 1998, the State of Hawaii Supreme Court ruled against the System in a class action suit filed by the retired public school principals, vice principals and teachers whose retirement benefits were calculated using the "High 3" method of computing average final compensation. Under the terms of the court order, the System was required to recalculate monthly retirement benefits for all members of the class who are (a) school principals and vice principals collecting a retirement benefit in 1984, (b) teachers collecting a retirement benefit in 1988, and (c) members of these groups who have since retired. The System substantially completed payments of over \$4 million to the 4,100 identified class members during the fiscal year ended June 30, 2000. The teachers filed an appeal and were awarded additional moneys as "interest" on the underpayments amounting to approximately \$1,000,000 in October 2000 by the State of Hawaii First Circuit Court. The System has filed an appeal of the First Circuit Court's decision to the Hawaii Supreme Court.

In 2000, the System initiated foreclosure proceedings against a borrower that has been in continued default on a commercial real estate loan, secured by a mortgage and other security interest. The borrowers subsequently filed a counterclaim against the System. In March 2002, the court appointed a receiver for the property at the request of the System and the receiver took possession of the property, operated it under the jurisdiction of the court, and collected and holds the net operating income. In March 2003, the borrowers and the System reached a settlement agreement whereby the borrowers would transfer title to the property to the System and the funds held in escrow as settlement for all claims and counterclaims. The transfer was completed and all claims settled effective upon approval of the court on September 9, 2003. The System will include the assets and liabilities and the results of operations of the property beginning September 9, 2003. As of June 30, 2003, the loan was recorded at fair value at the time of foreclosure, and all interest receivable was written-off.

As of June 30, 2003, the System was involved in a lawsuit relating to the development of a new computer system for the System, under a contract originally awarded in 1999. The contractor filed a lawsuit in 2002 that claimed the System breached the contract. The System filed a separate action against the contractor due to the failure of the contractor to adequately perform its contractual obligations and also named the company that guaranteed performance of the contract and the insurance company that provided a performance bond for the benefit of the System as defendants. The two lawsuits were consolidated by the courts. On September 8, 2003, all parties settled the lawsuits and mutually agreed to terminate the contract for the development of the computer system with the contractor providing the System computer software and licenses, imaged documents and miscellaneous services in exchange for payment of \$1 million by the System to the contractor. The amount will be capitalized in fiscal year 2004 when the goods and services are received.

# NOTE J - DEFERRED COMPENSATION PLAN

The System does not sponsor a deferred compensation program. System employees are eligible to participate in the deferred compensation plan sponsored by the State of Hawaii. The State sponsored plan was created in accordance with Internal Revenue Code Section 457. The plan, available to all System employees, permits them to defer a portion of their salary until future years. The deferred compensation is not available to the employees until termination, retirement, death, or an unforeseeable emergency. All compensation deferred under the plan is held by a custodian for the exclusive benefit of participants and beneficiaries.

# NOTE K - FIXED ASSETS

Fixed assets used in the operations are reported in statement of plan net assets at historical cost, net of accumulated depreciation. These assets are depreciated on a straight-line basis over an average useful life of three years, with no salvage value. Accumulated depreciation on equipment as of June 30, 2003 and 2002 was \$2,148,919 and \$1,542,328, respectively.

# REQUIRED SUPPLEMENTARY INFORMATION

| 1999                              | \$8,590,807                   | \$9,181,730                            | \$590,923  | 93.6%             | \$2,186,499         | 27.0%   |
| 1998                              | \$7,906,216                   | \$8,492,013                            | \$585,797  | 93.1%             | \$2,135,945         | 27.4%   |

\* Note: Items (2) and (3) include the unfunded liabilities related to the Early Incentive Retirement (EIR) Program retirees who retired on December 31, 1994 and June 30, 1995 amounting to \$69,414,527, \$70,218,385, \$75,173,210, \$77,736,700, \$80,110,400, and \$82,308,100 as of June 30, 2003, 2002, 2001, 2000, 1999, and 1998, respectively. For the fiscal year ended June 30, 2003, the annual payment related to the EIR Program cost of \$5,945,684 is included in the employer contribution requirement on the financial statements. Based on a level amortization period ending June 30, 2029, this represents a reduction of principal and payment of "interest" in the amount \$803,858 and \$5,141,826, respectively.

In June 2000, June 1999 and July 1998, the Legislature of the State of Hawaii enacted Acts 216, 100 and 151, respectively, which amends Sections 88-107 and 88-122 of the Hawaii Revised Statutes related to assumptions used in determining the actuarial valuation. The amounts as of June 30, 1999 and 1998 have been revised to be in compliance with these Acts and a related lawsuit settlement agreement.

# NOTES TO REQUIRED SUPPLEMENTARY INFORMATION

June 30, 2003

The information presented in the required supplementary schedules was determined as part of the annual actuarial valuation. Additional information as of the latest actuarial valuation follows.

| Valuation date                               | June 30, 2003          |
|--|------------------------|
| Actuarial cost method                        | Entry age normal       |
| Amortization method                          | Level dollar, closed   |
| Remaining amortization period (years)        | 26                     |
| Asset valuation method                       | 4-year smoothed market |
| Actuarial assumptions:                       |                        |
| Investment rate of return (set by statute)*  | 8.0%                   |
| Projected salary increases (set by statute)* | 4.0%                   |
| *Includes inflation at 4.0%                  |                        |
| Cost of living adjustments                   | 2.5% (not compounded)  |

In 2002, the Legislature of the State of Hawaii approved a bill changing the remaining amortization period to be fully amortized by June 30, 2029. Prior to that, the unfunded actuarial accrued liability was to be fully amortized by 2016.

The annual required contribution for the year ended June 30, 2003 was determined as part of an actuarial valuation dated June 30, 2000 that is consistent with the current actuarial valuation.

LINDA LINGLE GOVERNOR

December 19, 2003

# Dear Members:

It is once again my honor and privilege to present the Investment Section of the Comprehensive Annual Financial Report for the fiscal year ending June 30, 2003. The following are a few ERS investment highlights of the past fiscal year:

- As of June 30, 2003, ERS was one of the 150 largest defined benefit plans in the US with total assets of just under \$8.0 billion.
- The fund returned 2.97% for the fiscal year 2003, underperforming the benchmark return of 4.61% by 1.64%.
- Over the last three years the fund returned -3.21%, outperforming the composite benchmark return of -3.69% by 0.48% per year. In real dollars the 0.48% of outperformance each year has produced an extra \$143 million for the fund that would not have been achieved had the assets been invested passively in index funds.
- As part of our standard practices, we are conducting a search for a firm to provide investment consulting services and a decision is expected in 2003.

The spring of 2000 saw the end of the longest U.S. economic expansion in modern day history and with that the end of an escalating equity market. In the ensuing two years, equities encountered the worst bear market in the past 60 years. Accompanying the punishing equity market was an economic recession which was declared in March 2001. While the economic recession was "officially" over in November 2001, the equity market continued in a downward fashion until November 9, 2002. Since that date the equity markets have staged a very impressive rebound.

Investing is an up and down business. It is important to always maintain focus and discipline. At the ERS, we base our decisions on a few guiding principles fundamental to prudent investment management.

City Financial Tower • 201 Merchant Street, Suite 1400 • Honolulu, Hawaii 96813-2980 Telephone (808) 586-1660 • Fax (808) 586-1677 • http://www2.state.hi.us/ers/

- Diversify among asset classes that do not perform similarly at the same time. Diversification among asset classes, including investment size and style, should dampen overall portfolio volatility and improve performance over the long run. ERS has a diversified investment portfolio that ranges from conventional stock and bond investments to real estate and venture capital.
- Design and implement a procedure to systematically rebalance the portfolio back to target allocations. It seems against human nature to "sell the good ones" and "buy the bad ones." However, by systematically selling better performing assets and using the proceeds to buy more of the underperforming assets you are "selling high and buying low."
- Investing is a process that requires discipline. Through our disciplined investment process ERS has developed a strategy to invest the assets of our members and provide for their retirement benefits. As with any strategy, if you stick with it, there will be periods of underperformance in the short-term, however, given the long time horizon of the ERS we are not overly concerned about these short-term periods.

Recent allegations of misconduct against individuals and firms in the investment management business have called into question the honesty, integrity and accountability of all involved in the industry. The ramifications of these allegations may include changes in governance structures, increased enforcement of rules and regulations, transparency and increased disclosure by the firms and individuals involved in investment management. There will be more fallout in the short-term but the investment management business should emerge stronger from this experience.

We are committed to the interests of our members. We will continue to manage the assets of ERS in a prudent fashion, seeking reasonable market rates of return while attempting to avoid unreasonable risk. While we cannot guarantee future results, our disciplined investment process will allow us to maintain consistent performance for the long run.

Aloha pumehana,

T. Kimo Blaisdell

Chief Investment Officer

T. Kimo Polaisall

Chicago

Atlanta Dear Trustees:

Denver

Enclosed is our report on investment activity for the Hawaii Employees' Retirement System for periods ended June 30, 2003, as requested by the Government Financial Officers' Association (GFOA).

#### Hawaii ERS-Total Fund Performance

The total assets of the Retirement System were just under \$7.8 billion as of June 30, 2003, a decrease of roughly \$200 million for the fiscal year. The decrease in assets was primarily due to benefit payments, however, as there were positive investment gains for the year. The investment return for the total fund expressed as a time-weighted total rate of return was +2.97% for the 2003 fiscal year, compared to the benchmark's return of +4.61%. For the three-year period ending June 30, 2003 the total fund returned -3.21% per annum, ahead of the benchmark's -3.69%, and for the trailing five-year period the total fund posted a return of 1.49% per annum versus the benchmark's 1.98%.

# **Asset Class Performance**

Domestic equity returned -0.39% for the fiscal year, underperforming the S&P 500 Index's +0.25% and the Callan Domestic Equity Database median of -0.17%. Domestic fixed-income gained +11.12% for the year, beating the Lehman Brothers Aggregate return of +10.40% and the Callan Fixed-Income Database median return of +10.52%. International equity returned -7.90% for the 2003 fiscal year versus the MSCI EAFE Index return of -6.46%, whereas international fixed-income returned +20.43% versus the Citigroup Non-US Government Bond Index gain of +17.90%. Real Estate gained +6.89% for the year ending June 30, 2003 versus the NCREIF Total Index gain of 7.64%. Alternative investments were a negative contributor to performance, returning -11.26% for the fiscal year.

# **Market Conditions**

The fiscal year began with worst quarter for equity markets since the crash of 1987. Threats of war and terrorism continued to weigh heavily on investors' minds, along with concerns over the economy and corporate earnings. The beginning of the fiscal year also found capital markets reeling from a litany of corporate scandals which had occurred in previous quarters. Jittery investors continued to seek out bonds as a security blanket.

Despite a brief rally in October and November of 2002, equity markets continued to founder amidst a very real threat of war, numerous geopolitical risks abroad, and fear of a double dip recession. The turning point for the markets occurred on March 12, 2003, when the United States decided to go to war in Iraq. Until this point, the economy and the markets seemed to be ruled by uncertainty. Once this uncertainty was resolved, despite the new presence of armed conflict in the Middle East, both seemed to rally.

Generally speaking, the market tended to be led by lower quality or no-earnings stocks rebounding from several years of poor results. Growth stocks outperformed value stocks for the first time in many periods. Small cap stocks and large cap stocks were roughly even for the fiscal year.

The domestic bond market benefited from another rocky fiscal year for equities. Due to the lack of a serious inflation threat, further Federal Reserve interest rate cuts, and poor performance in the equity markets, the domestic fixed income market generated solid returns for the year ended June 30, 2003. Corporate bonds outperformed government secured treasury and agency bonds for the year. Many of the corporate backed securities downgraded in the second and third quarter of 2002 bounced back.

International equities underperformed US equities for the year ended June 30, 2003 as non-US stocks were actually in negative territory. This trend has reversed course since March 31, 2003 with international equities now well ahead of their domestic counterparts for the calendar year. International bonds bene fited from the dollar's decline, outperforming the US bond market with double digit returns.

Fiscal year 2004 has been very strong so far, with positive equity market results in the third and fourth quarters. Economic indicators are also improving. Throughout the difficult market conditions of the past three years, with its constant review and oversight, the Board continues to position the Retirement System for competitive performance consistent with its objectives.

Callan Associates Inc.

# Report on Investment Activity for the Employees' Retirement System of the State of Hawaii

Prepared by Callan Associates Inc.

December 2003

### **Outline of Investment Policies**

The primary goal of the Plan is the preservation of capital. The Board of Trustees seeks preservation of capital with a consistent, positive return for the Fund. Although pure speculation is to be avoided, the Board appreciates the fact that an above average return is associated with a certain degree of risk. Risk to be assumed must be considered appropriate for the return anticipated and consistent with the total diversification of the Fund.

# Expected Annualized Return and Risk

Based on 2003 capital market projections for 5 years, the target allocation is expected to achieve an average annualized return of 7.9% (5.3% real return with expected inflation of 2.6%). The annual nominal return is expected to fall within a range of -4.8% and 20.6% two-thirds of the time.

Long-range Asset Allocation Target

The ERS only invests in the following asset classes:

|                            | Lower Limit | Strategic Allocation | Upper Limit |
|----------------------------|-------------|----------------------|-------------|
| Domestic Equity            | 29%         | 32%                  | 35%         |
| Small/Mid Cap Equity       | 7%          | 9%                   | 11%         |
| International Equity       | 15%         | 17%                  | 19%         |
| Domestic Fixed-Income      | 19%         | 21%                  | 23%         |
| International Fixed Income | 5%          | 7%                   | 9%          |
| Mortgages                  | NA          | 0% ***               | NA          |
| Equity Real Estate         | 0%          | 9% *                 | 9%          |
| Alternative Investments    | 0%          | 5% **                | 5%          |

- \* The real estate target will be the percentage actually invested up to 9% of the total fund. Changes in the real estate target will be offset by an equal percentage change in the large cap domestic equity target.
- \*\* The alternatives target will be the percentage actually invested up to 5% of the total fund. Changes in the alternatives target will be offset by an equal percentage change in the large cap domestic equity target.
- \*\* The mortgage target will be the percentage of the total fund actually invested. Changes in the mortgage target will be offset by an equal change in the domestic bond target.

Adjustments in the above targets take place annually in conjunction with the annual asset allocation review. The target is evaluated on the basis of assets designated to each asset class by the Board, rather than on a current invested position. The target is to be pursued primarily by cash flow on a long-term basis and be revised if significant changes occur within the economic and/or capital market environment according to the rebalancing guidelines. The target is to be reviewed annually for reasonableness relative to significant economic and market changes. A formal asset allocation/liability study is conducted at least every three years to verify or amend the targets. The last formal asset allocation/liability study was completed in the first half of 2002. At that time, the Board chose to maintain the current strategic asset allocation implemented July 1, 2000. The target was again reviewed in early 2003. A full asset/liability study will next take place in early 2005.

# Portfolio Evaluation Benchmark

To monitor the total fund result, a special target index has been constructed to measure the fund's performance based on the current target mix. This serves as a minimum performance objective for the Fund. The target is adjusted quarterly to reflect the assets actually invested in real estate and alternative investments. The target index objective is included in all quarterly evaluation reports of the ERS. The composition of the index as of June 30, 2003 is:

- 35% of the Standard & Poor's 500 Stock Index
- 4.5% of the S&P Mid Cap 400
- 4.5% of the Russell 2000
- ° 21% of the Lehman Brothers Aggregate Bond Index
- ° 17% of the MSCI EAFE Index
- 7% of the Citigroup Non-U.S. World Government Bond Index
- 7.8% of the NCREIF Total Index
- 3.2% of the Post Venture Cap Index

Individual investment managers <u>are not</u> to be measured against this total fund objective. However, it is expected that the sum of their efforts exceeds the objective over time.

# Manager Evaluation

Individual domestic and international equity and bond managers are measured against relevant indexes and their respective peer groups of managers. Market indices and peer group benchmarks are assigned to each manager and are intended as a guide for the investment manager to understand the risk/reward posture of their portfolio. Real Estate managers are measured against the median performance of the Callan Associates Real Estate database and the NCREIF Total Index. Managers have full discretion to manage the risk posture of their portfolios relative to their designated market index and may, with conviction and appropriate expertise, execute security strategies not reflected by their market index as long as they conform to the investment guidelines and the laws of the State of Hawaii.

# **Investment Practices**

The full Investment Policy Statement describes in detail acceptable investment practices, manager reporting requirements, manager performance guidelines, the distribution of brokerage commissions, and securities lending guidelines. The IPS was revised in August 2003.

All rates of return are calculated using methodologies that are generally accepted by the Association for Investment Management and Research (AIMR). All domestic equity manager returns are daily, time-weighted rates of return based on custodial data. International equity, domestic fixed-income, and global fixed-income returns are monthly, time-weighted returns. Real estate returns are calculated using statements received directly from the manager. This ensures that the performance is based on accurate cash flows and appraisal values.

# **Investment Results**

# **Schedule of Broker Commissions**

The Employees' Retirement System participates in a Commission Recapture Program with four brokerage firms for equity trades, which are listed in the Investment Professionals section. Domestic and international investment managers are required to direct at least 35%, of all brokerage transactions to participating brokers. Commissions charged per share are based on the investment manager's normal rate schedule. All commissions recaptured are used exclusively by the ERS for the benefit of its members and beneficiaries. ERS does not guarantee participating brokers any minimums, required volumes or fees. During the fiscal year ended June 30, 2003 the ERS recaptured \$656,158 in commissions.

The following is a list of brokers who received \$40,000 or more in commissions during Fiscal Year 2003. A complete list of all commissions is available for review upon request.

Board of Trustees
Employees' Retirement System of
State of Hawaii
City Financial Tower
201 Merchant St., Ste. 1400
Honolulu, HI 96813-2980

Dear Trustees:

Subject:

Actuarial Valuation as of June 30, 2003

We certify that the information contained in the 2003 actuarial valuation report is accurate and fairly presents the actuarial position of the Employees' Retirement System (ERS) of the State of Hawaii (the System) as of June 30, 2003.

All calculations have been made in conformity with generally accepted actuarial principles and practices, and with the Actuarial Standards of Practice issued by the Actuarial Standards Board. In our opinion, the results presented comply with the requirements of the Hawaii statutes and, where applicable, the Internal Revenue Code, ERISA, and the Statements of the Governmental Accounting Standards Board. The undersigned are independent actuaries. One or more of them are an Enrolled Actuary, a Member of the American Academy of Actuaries, and/or are experienced in performing valuations for large public retirement systems.

# Actuarial valuations

The primary purpose of the valuation report is to determine the required employer contribution, to describe the current financial condition of the System, and to analyze changes in the System's condition. In addition, the report provides information required by ERS in connection with Governmental Accounting Standards Board Statement No. 25 (GASB No. 25), and it provides various summaries of the data.

Valuations are prepared annually, as of June 30th of each year, the last day of the System's plan year and the System's fiscal year.

### GABRIEL, ROEDER, SMITH & COMPANY

Trustees September 22, 2003 Page 2

# Financing objectives

The employer contribution amounts are calculated by the actuarial valuation, and these amounts are applicable for the fiscal year beginning two years after the valuation date, i.e., beginning July 1, 2005. The employer contributions, when combined with the contributions made by members, are intended to provide for the normal cost and to amortize the Unfunded Actuarial Accrued Liability (UAAL) over a closed period. Act 147/2002 amended the statute to liquidate the unfunded accrued liability over a longer period of time. It is now a closed period ending June 30, 2029.

# Progress toward realization of financing objectives

Based on this actuarial valuation as of June 30, 2003, the employer contribution is \$444,926,892 for Fiscal Year 2005/2006. This amount includes the normal cost and amortization of the UAAL over the remaining 26 years from June 30, 2003. It includes the impact of the significant growth in active member covered payroll, which increased 5.8%, from \$2.57 billion to \$2.72 billion. It also includes the effect of a third consecutive year of poor investment markets.

Employees and employers contributed the recommended amount for the 2002/2003 fiscal year. It is assumed that they will continue to contribute the recommended contributions as determined by the actuarial valuations. Therefore, all financing objectives are being realized.

The contribution requirement for FY 2005/2006 reflects the two-year lag between the valuation date and the beginning of the fiscal year to which that contribution applies. It assumes the employers' contributions for FY 2003/2004 are \$235.7 million and are \$328.7 million for FY 2004/2005. If these contributions are reduced, the \$444.9 million contribution for FY 2005/2006 will need to be recalculated.

# Benefit provisions

Since the last valuation, the legislature enacted the following benefit enhancement to the ERS statutes:

 Act 199/2003 provides a 6-year phase-in to unreduced retirement with 25 years of service regardless of age for Emergency Medical Technicians. There is no material effect on the actuarial liability.

See the Summary of Retirement Benefit Plan Provisions in the Introductory Section of this CAFR for more details on the benefit provisions.

Trustees September 22, 2003 Page 3

# Assumptions and methods

With the exception of the assumptions for the investment return and for the salary scale, the actuarial assumptions used were adopted based on the recommendations provided by an experience study performed by the prior actuary. The investment return assumption and the salary scale assumption were set by legislative action. Further detail on the assumptions and methods may be found in the Summary of Actuarial Methods and Assumptions of this report. The assumptions that are based on the actuaries' recommendations are internally consistent and are reasonably based on the actual experience of the System. These assumptions are also in full compliance with all parameters established by GASB No. 25.

#### Data

Member data for retired, active, and inactive participants was supplied as of March 31, 2003, by the System's staff. We have not subjected this data to any auditing procedures, but have examined the data for reasonableness and consistency with the prior year's data. Asset information was supplied by the System's staff.

# Responsibility for Tables and Schedules

The actuary is responsible for the information with respect to years after 1999 in the Required Supplementary Information, the Schedule of Employer Contributions, and the Notes To Required Supplementary Information in the Financial Section of the System's Comprehensive Annual Financial Report (CAFR). Information with respect to years prior to 2000 was supplied by the System.

Tables and schedules in the Actuarial Section of the CAFR were generally prepared directly by the Actuary. Certain of these tables, however, were prepared by the System utilizing information from this report. When those tables were prepared by the System from our report, they are so noted.

The following exhibits and tables were prepared by the Actuary:

- Actuarial Certification Statement
- Exhibit 1 Actuarial Present Value of Future Benefits
- Exhibit 2 Analysis of Normal Cost
- Exhibit 3 Development of Actuarial Value of Assets
- Exhibit 4 Total Experience Gain or Loss
- Exhibit 5 Development of Employer Cost
- Exhibit 6 Calculated Employer Contribution Requirements

#### **Actuarial Certification Statement (continued)**

The actuarial valuation as of June 30, 2003 is based on the provisions of Chapter 88 of the Hawaii Revised Statutes, as amended. The assumptions used in the cost calculations were those adopted by the Board of Trustees based on statutory requirements and on the prior actuary's actuarial experience investigation report covering the 1995-2000 period. The actuarial calculations were performed by qualified actuaries in accordance with accepted actuarial procedures.

In our opinion, the contributions required to meet the System's liabilities were calculated in accordance with the provisions of Chapter 88 regarding the funding of the Employees' Retirement System on an actuarial reserve basis.

W. Michael Carter, FSA, EA

Senior Consultant

Figures from 1999 valuation has been revised to reflect Act 100/1999 and related lawsuit, Act 216/2000 Figure from 2001 valuation has been revised to reflect reamortization to 6/30/2029 under Act 147/2002 3 3

#### **Summary of Actuarial Methods and Assumptions**

#### I. Valuation Date

The valuation date is June 30th of each plan year. This is the date as of which the actuarial present value of future benefits and the actuarial value of assets are determined.

#### II. Actuarial Cost Method

Under the entry age normal actuarial cost method, the total employer contribution is comprised of the "normal cost" plus the level annual payment required to amortize the unfunded actuarial accrued liability over the remaining period of 29 years from July 1, 2000. The normal cost is the level percentage of payroll contribution required to accumulate the needed funds to pay all expected benefits. Actuarial gains and losses resulting from differences between actual and assumed experience are reflected in the unfunded accrued liability.

#### III. Actuarial Value of Assets

The actuarial value of assets is equal to the market value, adjusted for a four-year phase in of actual investment return in excess of expected investment return. The actual return is calculated net of investment and administrative expenses, and the expected investment return is equal to the assumed investment return rate multiplied by the prior year's market value of assets, adjusted for contributions, benefits paid, and refunds.

#### IV. Actuarial Assumptions

#### A. Economic Assumptions

- 1. Investment return: 8% per year, compounded annually, composed of an assumed 4.00% inflation rate and a 4.00% net real rate of return. (Set by legislative action.)
- 2. Salary increase rate: 4% per year, compounded annually. (Set by legislative action.)

#### B. Demographic Assumptions

#### 1. Mortality rates

#### General Employees

- a. Healthy males 1994 US Group Annuity Mortality Static Table for males, set back one year.
- b. Healthy females 1994 US Group Annuity Mortality Static Table for females.
- c. Disabled males 1994 US Group Annuity Mortality Static Table for males, set forward ten years.
- d. Disabled females 1994 US Group Annuity Mortality Static Table for males, set forward eleven years.

#### **Teachers**

- a. Healthy males 1994 US Group Annuity Mortality Static Table for males, set back three years.
- b. Healthy females 1994 US Group Annuity Mortality Static Table for females, set back one year.
- c. Disabled males 1994 US Group Annuity Mortality Static Table for males, set forward four years.
- d. Disabled females 1994 US Group Annuity Mortality Static Table for males, set forward six years.

#### Police and Fire

- a. Healthy males 1994 US Group Annuity Mortality Static Table for males, set forward two years.
- b. Healthy females 1994 US Group Annuity Mortality Static Table for females, set forward two years.
- c. Disabled males 1994 US Group Annuity Mortality Static Table for males, set forward five years.
- d. Disabled females 1994 US Group Annuity Mortality Static Table for males, set forward five years.
- 2. Disability rates The assumed total disability rates for employees covered by the contributory plan and the noncontributory plan at select ages are as follows:

|     | General Employees | Teachers      | Police and Fire |
|-----|-------------------|---------------|-----------------|
| Age | Male & Female     | Male & Female | Male & Female   |
| 25  | 0.025%            | 0.008%        | 0.010%          |
| 30  | 0.025%            | 0.008%        | 0.010%          |
| 35  | 0.030%            | 0.010%        | 0.012%          |
| 40  | 0.045%            | 0.015%        | 0.018%          |
| 45  | 0.090%            | 0.030%        | 0.036%          |
| 50  | 0.200%            | 0.066%        | 0.080%          |
| 55  | 0.425%            | 0.139%        | 0.170%          |
| 60  | 0.870%            | 0.285%        | 0.348%          |

Note: The disability rates project the percentage of employees at each age that is assumed to become disabled before retiring. The percentage of disabilities assumed to be ordinary disability as opposed to accidental disability varies by employee group as follows:

|            | General Employees | Teachers      | Police and Fire |
|------------|-------------------|---------------|-----------------|
| Type       | Male & Female     | Male & Female | Male & Female   |
| Ordinary   | 85%               | 100%          | 50%             |
| Accidental | 15%               | 0%            | 50%             |

3. Termination Rates - Separate male and female rates, based on both age and service, developed from 2000 Experience Study. Rates reflect terminations for causes other than death, disability or retirement. Sample rates are shown below:

#### General Employees

#### C. Other Assumptions

- 1. Percent married: 77% of male employees and 57.6% of female employees are assumed to be married.
- 2. Age difference: Male members are assumed to be four years older than their spouses, and female members are assumed to be four years younger than their spouses.
- 3. Percent electing annuity on death for contributory participants (when eligible): All of the spouses of married participants who die after becoming eligible for a retirement benefit are assumed to elect an annuity or a refund, whichever is more valuable at time of participant's death.
- 4. Percent electing deferred termination benefit: vested terminating members are assumed to elect a refund or a deferred benefit, whichever is more valuable at the time of termination.
- 5. Assumed age for commencement of deferred benefits: Members electing to receive a deferred benefit are assumed to commence receipt when eligible for early retirement.
- 6. Administrative expenses: The assumed investment return rate represents the anticipated net return after payment of all investment and administrative expenses.
- 7. Reemployment, purchase of service, transfers: No recognition is made of (i) future member reimbursements upon reemployment, (ii) future purchase of additional service, or (iii) special transfer provisions.

#### V. Participant Data

Participant data was supplied on CD-ROM for (i) active members, (ii) inactive vested members, who are entitled to a future deferred benefit, (iii) members and beneficiaries receiving benefits.

Salary supplied for the current year was based on the earnings for the March preceding the valuation date. This salary was compared to March base pay plus a twelve-month average of overtime, with the greater of the two being used for valuation pay.

#### VI. Dates of Adoption of Assumptions and Methods

Generally, actuarial assumptions and methods were adopted by the Board of Trustees in 2000 as recommended by the Segal Company, the prior actuary, with respect to the assumptions, and by Gabriel, Roeder, Smith & Company with respect to the methods. These assumptions and methods were first reflected in the 2001 actuarial valuation. The legislature sets the investment return assumption and the salary scale assumption in the statutes governing the System.

#### **Summary of Plan Changes**

#### Act 65, effective July 1 1999

1. Requires judges who enter or re-enter service after June 30, 1999 to be at least 55 years old and five years of service or have 25 years of service to rehire.

#### Act 100, effective June 30, 1999

1. Uses actuarial investment earnings in excess of a ten percent (10%) actuarial investment yield rate to reduce the employer's contribution requirements by \$147.0 million and \$50.6 million for fiscal years ending June 30, 2000 and 2001, respectively.

#### **Act 284, effective June 30, 2001**

Provide an increase in pension benefits for current retirees with military service who retired prior to July 2, 1989. A retirant who rendered honorable active military service could be granted up to 4 years of military service credits based upon his/her years of credited service under the system, not to exceed his/her actual years of military service. The years of military service credits granted are based on the following schedule:

- 0 years for retirants with less than 8 years of credited service
- Up to 2 years of retirants with 8 years or more of credited service
- Up to 3 years of retirants with 20 years or more of credited service
- Up to 4 years of retirants with 25 years or more of credited service

For each year of military service credits granted on the schedule above, the retirant will be provided a \$36.00 increase is his/her monthly pension or retirement allowance.

#### Act 199, effective June 30, 2003

Emergency Medical Technicians (EMTs) are allowed to retire with an unreduced benefit after 25 years of service regardless of age, of which the last five or more years prior to retirement must be in that capacity. This feature is phased in one year at a time, July 1, 2003 through June 30, 2008.

| 1999     | 902.2                       | 4,682.2   | 3,517.2   | 8,590.8                         | 100%  | 100%       | 85.5%      |  |  |
| 2000     | 938.0                       | 4,914.5   | 3,817.8   | 9,204.7                         | 100%  | 100%       | 87.8%      |  |  |
| 2001     | 876.0                       | 5,232.4   | 4,398.5   | 9,516.0                         | 100%  | 100%       | 77.5%      |  |  |
| 2002     | 889.9                       | 5,499.4   | 4,820.9   | 9,415.2                         | 100%  | 100%       | 62.7%      |  |  |
| 2003     | 872.3                       | 5,912.3   | 5,167.5   | 9,074.0                         | 100%  | 100%       | 44.3%      |  |  |

Note: Actuarial accrued liabilities for 1994 are not comparable with amounts shown for later years. For 1994, the sum of the three actuarial accrued liabilities equals the total pension benefit obligation. Beginning 1995, the actuarial accrued liabilities are equal to the actuarial accrued liability under the Entry Age Normal Actuarial Cost Method.

Note: Rates for 1994 are not comparable with rates shown for later years. Beginning 1995, Amortization Percent includes EIR payment percentage and Excess Investment Earnings Credit percentage. Also, beginning 1995, the funding method was changed from Frozen Initial Liability Actuarial Cost Method to Entry Age Normal Actuarial Cost Method. Beginning in 1997, the actuarial value of assets was changed from book value to a market related value.

| 2002-2003   | 8.0%                                  | 0.18%                             | 2005-2006             | 444.9                               | -                                    | 444.9                      |

- Notes: (1) Beginning in appropriation year 1997-98, total calculated contribution includes appropriations for the Early Incentive Retirement program. 2001 results adjusted for reamortization of Unfunded Actuarial Accrued Liability and Early Incentive Retirement Program to June 30, 2029 under Act 147/2002.
  - (2) \$99.4 million in additional employer contributions were deferred pursuant to the pension reform provisions in Act 327/1997.
  - (3) Beginning with the 1996-97 fiscal year, the actuarial investment income is the sum of the expected net investment income based on the actuarial assumption of 8% and a four-year smoothing of the difference between the market value of assets at year-end and the expected actuarial value of assets. In prior years, the actuarial investment income was the sum of interest, dividends, and net realized gains less net realized losses and investment expenses.
- \*\* Schedule compiled by ERS Staff from actuary reports.

#### **State Retirement System's Funded Ratios**

Funded Ratio

Number of General State Retirement Systems (excluding separate systems for teachers, school employees, or municipal employees)

Note:

GASB 25 funded ratios are shown for 48 general state retirement systems for valuation year(s) through December 31, 2002. A funded ratio is not shown for the Nebraska System because it is a defined contribution plan. A funded ratio for the New York System does not exist because of the use of the Aggregate Cost Method.

<sup>\*</sup> Hawaii's GASB 25 funded ratio for the fiscal year ended June 30, 2003 was 75.9%.

<sup>(1)</sup> Employer appropriations were made in accordance with actuarially determined contributions requirements. Prior to Fiscal Year 1996, employer appropriations included funding for administrative expenses.

<sup>(2)</sup> Covered payroll as reported by the actuary, effective March 31 of each year.

<sup>(3)</sup> Prior to Fiscal Year 1997, assets were reported at cost, thus net investment income includes only realized gains and losses, plus dividends, interest and other earnings. Effective July 1, 1996, ERS adopted GASB Statement 25 changing from reporting investments at cost to reporting investments at fair value (includes unrealized gains and losses).

<sup>\*</sup> Includes recognition of previously deferred income and net unrealized gains and losses totaling \$594,325,421 as a result of adoption of GASB Statement 25.
